

Energy Intelligence. Amplified Profit.

Power your business with the expertise of the Chamber Energy Program, created to deliver best-in-class energy management and sustainability solutions across Ohio. Our expanded team of energy consultants leverages deep experience to uncover opportunities that boost profitability, streamline operations, and implement innovative energy strategies tailored to your business.

Sustainability & Energy Efficiency Experts.

The Chamber Energy Program offers comprehensive, vendor-neutral solutions for energy management and sustainability.

Our combined services include:

- Renewable energy consulting
- Energy efficiency services
- Energy procurement
- Sustainability planning

With access to over 150 suppliers and decades of experience, we **help organizations reduce operating costs**, improve efficiency, and achieve environmental goals through tailored strategies and objective advice. With locations across Ohio, we offer our clients an even broader geographic reach and enhanced resources.
